DJPro Classic
Radio Automation

⊗ **PRODUCT** OVERVIEW

DJPro Classic is a complete RADIO ON-AIR SYSTEM. DJPRO perfectly matches the needs both of big structured radio networks and of regional and local ones. More than 1500 radio broadcasters all over the world have chosen **DJPro Classic** for their private and public radio stations.

DJPro Classic is a powerful and reliable playout software ensuring the maximum stability and safety on-the-air. It matches all requirements a broadcaster needs during the daily radio workflow, maximizing all tasks to save time and resources.

DJPro Classic can manage more than one radio station, with simultaneous or multiple playouts improved by different advertisement area networks (advertisement splits). At the same time, **DJPro Classic** can also broadcast different newscasts in different areas.

The On-Air module is the result of several years of research on the ergonomic use. The GUI displays the main on-air playout channel, and other information are displayed simultaneously, the advertisement block-time, as well as the preparation and helper tools: cue/pfl auxiliary input monitoring, playlist real-time modification, auto-recorder and time signal announcement.

It can be configured with different redundancy levels to manage one or more servers using the "Automatic Auto-change Network Connection" without any on air interruption.

Thousands of workstations can be managed via LAN.

DJPro Classic manages the LogIn and the LogOut of each user, Password protected, with different access levels. The Playout is compatible with multiple audio formats, such as WAV. MP3. MP2. MPG.

DJPro Classic offers a wide range of features for OB applications.
